

**Amendments to the Claims**

The current listing of the claims replaces all previous amendments and listings of the claims.

1. (Currently Amended) A glass product comprising:  
a main container body;  
~~at least one a secondary container body connected to the main container body and having a substantially cylindrical shape; and~~  
a collar open to an exterior of the container interposed between and communicating with said main container body and ~~at least one second~~ the secondary container body, said collar having an axis not parallel to an axis of said main container body and an axis of said ~~at least one~~ secondary container body.
2. (Previously Presented) The glass product of Claim 1, wherein said main container body comprises at least 20% of glass in the glass product.
3. (Previously Presented) The glass product of Claim 1, wherein said main container body comprises at least 60% of glass in the glass product.
4. (Previously Presented) The glass product of Claim 1, wherein said axis of said main container body and said axis of said collar form an angle between 60° and 180°.
5. (Previously Presented) The glass product of Claim 4, wherein said axis of said main container body and said axis of said collar form an angle between 90° and 150°.
- 6.-15. (Canceled)
16. (New) The glass product of Claim 1, wherein the secondary container body is configured to extend above the collar and the main container body.
17. (New) The glass product of Claim 16, wherein the axis of the collar is configured to extend in a direction between horizontal and vertical.

18. (New) The glass product of Claim 1, wherein the main container body is configured to extend along its axis in an about vertical direction, the collar is configured to extend along its axis at a first angle relative to the axis of the main container body, and the secondary container body is configured to extend along its axis at a second angle relative to the axis of the collar, when a bottom surface of the main container body contacts a surface on which the glass product is to be disposed

19. (New) The glass product of Claim 18, wherein the first and second angles are about equal.

20. (New) The glass product of Claim 18, wherein the main and secondary container bodies extend along their axes distances greater than a distance in which the collar extends along its axis.

21. (New) The glass product of Claim 18, wherein the main and secondary container bodies have substantially cylindrical shapes.

22. (New) The glass product of Claim 21, wherein the collar comprises a substantially cylindrical shape.

23. (New) The glass product of Claim 22, wherein the first and second angles are about 120°.

24. (New) The glass product of Claim 23, wherein the main and secondary container bodies, and the collar are disposed in about Y-shape.

25. (New) The glass product of Claim 1, wherein the axis of the collar is configured to extend at an angle between horizontal and vertical.

26. (New) The glass product of Claim 25, wherein the axis of the collar is configured to extend at an angle of about 120° from a bottom surface of the main container body on which the glass product is configured to be disposed.

27. (New) The glass product according to claim 26, wherein the axis of the secondary container body is configured to extend at an angle of about 120° from the axis of the collar, such that the glass product has an about Y-shape.

28. (New) The glass product according to claim 27, wherein at least one of the main and secondary container bodies, and the collar, has an about cylindrical shape.

29. (New) The glass product according to claim 28, wherein each of the main and secondary container bodies, and the collar, have an about cylindrical shape.
